**DETAILED ACTION**

***Election/Restrictions***

Applicant's election with traverse of Group I, claims 1-21 in Paper No. 7 is acknowledged. The traversal is on the ground(s) that once the stabilized liquid preparation is searched then the method of using it is also searched. This is not found persuasive because as is evident in the last office action the preparation can be used in a different method. Further, applicant's argument is in error. Simply because a piece of art may read on the product does not also mean that the same piece of art would read on a method using it. Otherwise, according to applicant's logic, then any new use of a product would not be patentable. Applicant once again as is noted in the interview summary form attached appears to be confused. Simply because a product is not used for applicant's method does not mean that the art does not read right on applicant's claims. The method of using the product is not being examined here. Thus, claims 22-24 are withdrawn from further consideration by the examiner.

Applicant also traverses the election of species. If applicant wants to admit on the record that the various species are obvious variants over one another then applicant is free to do so. Since applicant does not appear to want to do that, applicant is basically admitting that the species are not obvious variants over one another.

The requirement is still deemed proper and is therefore made FINAL.

***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2000023696 or EP 952215 taken with Sato et al. and further in view of Roy et al. or Kessler et al.

Applicant has argued that the combination of components is not taught in the references.

It is well known that it is *prima facie* obvious to combine two or more ingredients each of which is taught by the prior art to be useful for the same purpose in order to form a third composition which is useful for the same purpose. The idea for combining them flows logically from their having been used individually in the prior art. *In re Sussman*, 1943 C.D. 518; *In re Pinten*, 459 F.2d 1053, 173 USPQ 801 (CCPA 1972); *In re Susi*, 58 CCPA 1074, 1079-80; 440 F.2d 442, 445; 169 USPQ 423, 426 (1971); *In re Crockett*, 47 CCPA 1018, 1020-21; 279 F.2d 274, 276-277; 126 USPQ 186, 188 (1960).

Thus, since the individual ingredients are known in the art to be used individually for the same purpose, to use them together is obvious.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
